

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION V

DATE: May 6, 1993

SUBJECT: Pagel's Pit--Laboratory Evaluation

FROM: Bernard J. Schorle, WMD, IL/IN Remedial Response No. 2 *BJS.*
(HSRL-6J)

TO: Dennis J. Wesolowski, Central Regional Laboratory (SLL-10C)

Attached are copies of a few pages from the draft Quality Assurance Project Plan that has been submitted for review that I believe will answer the questions that you asked:

Page 5 of Section 2, which lists the laboratories that are to be used;

Table 1-1, Sample Type and Estimated Sample Numbers (which lists the tests to be done by the two laboratories);

Table 3-1, Organic Target List (OTL), Purgeable GC VOCs, and Reported Detection Limits (RDLs);

Table 3-2, Inorganic Target List (ITL) for Metals in Groundwater;

Table 3-3, Indicators, Field Measurements, Physical Characteristics, and Non-Aqueous Parameter Lists and Required Detection Limits (which lists the indicator tests to be done);

Table 3-4, Summary of Physical Characteristics Method References (which you may not need to be concerned about); and

Table 7-1, Summary of Analytical Methods.

I am also attaching a copy of the Statement of Work that is part of the Consent Decree. This site is an operating solid waste landfill that accepts primarily municipal wastes and sewage sludge. Because it is still operating, some of the remedial actions will be spread over a number of years.

If you have any further questions or I neglected to answer one of the questions that you raised, please let me know (886-4746).
